Psychology at Indiana University: From Bryan to Skinner.
Capshew, James H; Hearst, Eliot.

AB Traces the growth of psychology at Indiana University from its origins in the 1880's, as a result of W. L. Bryan's efforts, to its position of a major academic and research center in the 1940's under B. F. Skinner's chairmanship. Significant contributions by the department's members during this period are reviewed and assessed.
